

Oracle SLM deployment unifies global supplier network

A 150-year old, Fortune 500 manufacturer of building materials, sells through a chain of over 4000 company-operated stores. The company's other brands are sold through home centers, dealers, hardware stores, automotive retailers, and industrial distributors in over 115 countries. The company wanted a unified supplier lifecycle management solution that provided for all of their existing supplier network.

Approach

SwankTek proposed deployment of Oracle Supplier Hub, Supplier Lifecycle Management and iSupplier Portal in the client's instance of Oracle EBS. This will ensure tighter integration and easier exchange of data across the enterprise.

Solution

SwankTek deployed Oracle MDM with Supplier Lifecycle Management (SLM), Oracle Supplier Hub and iSupplier Portal in client's instance of Oracle EBS covering over 140,000 suppliers. Project kick-off involved supply chain, compliance, accounting,, governance, procurement, recipe systems, manufacturing and support teams.

The global deployment covered several thousand suppliers and distributors, creating a consolidated view of supplier information and global spending and improved management of supplier information using a single record of truth.

SwankTek is a multifaceted, premium technology services company based in Nutley, New Jersey. Over the 12 years since its founding, the company has successfully delivered solutions to Fortune 100 and industry leading companies in the world.
